How-To Video

1. Instructions & Demonstration Details

4) Slice bell peppers. In the video, the person slices yellow and red bell peppers into thin 1/4 inch wide strips using a kitchen knife and wooden cutting board.

I'm not confident with knives. Any tips?

2. Accessible Tips & Workarounds

◄) Use kitchen scissors to cut peppers directly over a tray or bowl, so you can easily find all the pieces with touch. Or, you can wear a cut resistant glove.

Does this look complete?

3. Proactive Progress Feedback

4) You don't seem to be done yet because there are still some larger yellow pepper pieces on the right side. Try feeling for any thicker slices and trimming them down so they match the thinner ones. Keep going, you're almost there!
